EXAMINER'S AMENDMENT

The applicant's response filed 9/29/2004 to the Office action has been entered. Claims 4-9 and 12-16 are pending.

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Daniel A. Geselowitz on 2/3/2005.

2. The application has been amended as follows:

Cancel claims 12-16.

3. The following is an examiner's statement of reasons for allowance:

Concerning claims 4-9, no prior art has been found teaching or suggesting the method for analyzing an intestinal bacterial flora of a subject comprising the steps of amplifying the nucleic acid of an intestinal bacterial group in a sample extract from the subject with a specific PCR primer and hybridizing the amplified nucleic acid with a plurality of probes.

The closest prior art is the reference of Hamad et al. Hamad et al. disclose a method of studying microflora of Sudanese sorghum flour (See pg. 764, the Abstract). Seven strains of *Lactobacillus* were isolated, representing the dominant flora (See pg. 764, the Abstract). The DNA was isolated from *lactobacilli* (See pg. 765 column 1, five paragraph). RAPD-PCR was performed with an arbitrary primer (See pg. 765, column 1, seventh paragraph). However,

Art Unit: 1637

Hamad et al. do not disclose that the intestinal bacterial flora, which is extracted from a sample of a subject and the amplified nucleic acid is analyzed via hybridization of a plurality of probes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
